The Fifth Annual Symposium on Environmental and Social Sustainability in Supply Chains

Institute for Business & Social Impact, Haas School of Business, UC Berkeley
Institute for Environmental and Social Sustainability, Kelley School of Business, Indiana University

Chou Hall (2220 Piedmont Ave, Berkeley), 6th Floor Spieker Forum

October 31st, 2026

8:30 AM	Check-in and Refreshments
8:55 AM 9:00 AM	Welcome Opening Remarks: **Wedad Elmaghraby**, Dean's Chair of Operations Management, Robert Smith School of Business, University of Maryland; INFORMS President-Elect
9:10 AM	Moving Grand Challenges from OM Vision to OM Action Grand Challenge Proposal Leads: 1. Food security: **Sadan Kulturel-Konak, Abdullah Konak** 2. Healthcare 1: **Vivek Choudhary, Xiaodan Shao** Healthcare 2: **Feryal Erhun** (tentative) 3. Education: **Mahyar Eftekhar, Owen Wu** 4. Gender Equality: **Margret Bjarnadottir** 5. Water: **Kevin Dooley** 6. Energy 1: **Christian Kaps** 7. Energy 2: **Owen Wu** 8. Sustainable cities: **Jingwei Zhang, Alexandre Jacquillat** 9. Cultural Heritage Protection: **Jan Fransoo, Abhishek Deshmane**
9:40 AM	From Challenges to Possibilities: Ideas Around the Table Small-group discussions led by Grand Challenge Proposal Leads
10:20 AM	Coffee Break
10:40 AM	**Naveen Sikka,** Chief Executive Officer, Terviva
11:15 AM	Fireside Chat with **Matteo Kausch**
11:50 AM	Explore Another Grand Challenge at Lunch Conversations Lunch
1:00 PM	From the Tables: Insights and Inspirations Grand Challenge Proposal Leads

The Fifth Annual Symposium on Environmental and Social Sustainability in Supply Chains

1:10 PM	The Double Agent: What AI Is Doing to Energy Supply Chains, and What It Can Do to Fix Them **Ozge Islegen-Wojdyla**, Co-Founder & CTO at TrueMeter
1:45 PM	Fireside Chat with **Amy Chan**, Chief Sustainability Officer, Synaptics
2:20 PM	Coffee Break
2:40 PM	Societal Impact of Operations Management in Emerging Markets: Lessons from Two Projects **Vishal Gaur**, Anne and Elmer Lindseth Dean of the Johnson Graduate School of Management, Cornell SC Johnson College of Business
3:15 PM	Trade Policy, Labor, and Climate Disruptions in Global Supply Chain Networks **Anna Nagurney**, Eugene M. Isenberg Chair in Integrative Studies, Isenberg School of Management, University of Massachusetts Amherst
3:50 PM	Coffee Break
4:10 PM	Operations Management for Sustainable Development and Public Policy Making **Jan Fransoo**, Professor of Operations and Logistics Management, Tilburg School of Economics and Management, Tilburg University
4:45 PM	Panel Discussion on OM Sustainability Research **Vishal Gaur, Anna Nagurney, Jan Fransoo**
5:15 PM	Closing Remarks

Speakers at the Fifth Annual Symposium on Environmental and Social Sustainability in Supply Chains

Amy Chan

Synaptics

Amy Chan is currently Chief Sustainability Officer at Synaptics, a semiconductor company focused on EdgeAI solutions, and a Lecturer at UC Berkeley Haas. With nearly two decades of leadership experience across technology, finance, and academia, she brings deep expertise in environmental impact, human rights, and global supply chains. Previously, she served as the inaugural Chief Sustainability Officer at UC Berkeley's Haas School of Business. Amy has also spent over a decade at Apple, where she spearheaded comprehensive supply chain sustainability programs that earned the company consecutive EPA Safer Choice Partner of the Year awards. Earlier in her career, she held finance roles at the World Bank's International Finance Corporation and Credit Suisse investment banking division. Amy holds an MBA from Harvard Business School and a B.S. from UC Berkeley Haas.

Wedad J. Elmaghraby

Robert H. Smith School of Business, University of Maryland

Wedad J. Elmaghraby is Dean's Chair of Operations Management. Her research interests are at the interface of operations management, economics and behavioral decision-making. Her current research includes market design to promote sustainable business paradigms in operations, online auctions in business-to-business secondary markets, and behavioral factors in consumer decision making and business-to-business contract design.

She currently serves as an Amazon Scholar and INFORMS President-Elect. She has previously served as a Department Editor at M&SOM, Senior Editor at POMS, the President of the MSOM Society, the Behavioral Operations Section, and POMS College of Behavior in Operations Management. She has served as the Director of the Deloitte Initiative on Artificial Intelligence and Learning and co-director of the Smith Analytics Consortium.

Jan C. Fransoo

Tilburg School of Economics and Management, Tilburg University

Jan C. Fransoo is Professor of Operations and Logistics Management at the Tilburg School of Economics and Management. He has conducted research across a wide variety of domains and methodologies, all related to supply chain and operations management. He currently serves as Department Editor of Management Science, Associate Editor of Decision Sciences and Senior Editor of Production and Operations Management. His current research studies retail operations and urban logistics in developing markets, transitions in the logistics industry, global supply chain dynamics, and interaction of human decision makers with advanced analytics. Much of this research is conducted in collaboration with multinational companies, technology startups, and intergovernmental agencies such as the World Bank and the Interamerican Development Bank.

From 2018 until 2020, he was on the faculty at Kuehne Logistics University in Hamburg, Germany, simultaneously serving as the University's Dean of Research and Member of the Executive Board. Prior to joining KLU, he served for 22 years on the faculty at Eindhoven University of Technology in the Netherlands, where he was Founding Program Director of the MSc program in Operations Management & Logistics, and subsequently served as Dean of the University's Graduate School and Director of the 4TU Institute of Technological Design.

Vishal Gaur

Johnson Graduate School of Management, Cornell University

Vishal Gaur is the Anne and Elmer Lindseth Dean and professor at the Samuel Curtis Johnson Graduate School of Management at the Cornell SC Johnson College of Business. Previously, Gaur served as the associate dean for MBA programs and as the founding program director of the Master of Science in Business Analytics degree program at Johnson.

Gaur's research is focused on supply chain management, e-Commerce, and retailing, with an emphasis on the modeling of large-scale data for performance analysis, forecasting, and decision-making. His research has been implemented in practice at many companies and has received numerous awards, including the 2006 Wickham Skinner Early Career Research Award, and a finalist in the 2020 INFORMS Innovative Applications of Analytics Award for collaborative work with IndiaMART. His article "Building a Transparent Supply Chain" in the March-April 2020 issue of Harvard Business Review was selected for HBR's The Year in Tech, 2022. He served as a department editor for *Management Science* from 2014 to 2021 and as the founding department editor of the Retail Operations department for *Production and Operations Management*. Gaur became a Distinguished Fellow of the MSOM Society of INFORMS in 2024.

Gaur is the 2022 recipient of the Class of 1992 Apple Award for Excellence in Teaching, the 2020 recipient of the Stephen Russell Distinguished Teaching Award, a three-time winner of the Johnson School's Core Faculty Award, the Cornell-Tsinghua Dual Degree MBA Gravitas Award in 2021, the Johnson Cornell Tech Core Faculty Award by the graduating class of 2017, and honorable mention in the George B. Dantzig Dissertation Competition in 2001.

Gaur earned his PhD from the Wharton School, an MBA from the Indian Institute of Management Ahmedabad, and a BTech in computer science and engineering from the Indian Institute of Technology Delhi.

Ozge Islegen-Wojdyla

TrueMeter

Ozge Islegen-Wojdyla, Ph.D. is the co-founder and CTO of TrueMeter, an AI platform that manages, audits, and optimizes utility spend for multi-location restaurant, retail, and hotel chains. TrueMeter's agents work across thousands of utilities and tariff structures and act on what they find: recovering billing errors, correcting rate plans, and steering procurement in deregulated markets.

Ozge spent more than a decade studying the economics of energy markets before building technology to change them. She earned her Ph.D. at Stanford researching energy supply chains and pricing, with work spanning carbon policy, utility technology transitions, solar manufacturing economics, and regulated versus deregulated market design. She then joined the faculty at Northwestern University, where she taught energy markets and pricing to doctoral students and data analytics to MBA students. In 2019 she left academia for Instacart, leading pricing experiments as a senior data scientist through the company's hypergrowth at the start of the pandemic. The experience confirmed what she had long suspected: rigorous analysis of rich data, applied in real-time and at-scale can make a real difference. TrueMeter is where those two careers meet. The AI platform processes every bill in the context of the tariff, contract, and market behind it, so it catches what a manual audit would take months to find and a bill-pay service would never look for. That is how it finds savings for customers faster, at lower cost, and across an entire portfolio at once. Ozge writes and speaks about AI-driven energy optimization, the structural data problems of the U.S. utility industry, and what it takes to build agentic systems in one of the most complex and least standardized data environments in the country.

Anna Nagurney

Isenberg School of Management, University of Massachusetts Amherst

Anna Nagurney is the Eugene M. Isenberg Chair in Integrative Studies at the Isenberg School of Management at the University of Massachusetts Amherst and the Director of the Virtual Center for Supernetworks, which she founded in 2001. She holds Bachelor of Science, Bachelor of Arts, Masters of Science, and PhD degrees from Brown University in Providence, RI. Anna is a member of the Board of Directors of the Kyiv School of Economics (KSE) in Ukraine and also serves on its International Academic Board. She is the author/editor of 17 books, more than 240 refereed journal articles, and over 50 book chapters. Anna is an active member of professional societies, including INFORMS, the OR Society, POMS, the Network Science Society, and RSAI.

Anna's research focuses on network systems from transportation and logistical ones, including supply chains, to financial, economic, social networks and their integration, along with the Internet. She studies and models complex behaviors on networks with a goal towards providing frameworks and tools for understanding their structure, performance, resilience, and security, and the impacts of policies, and has contributed also to the understanding of the Braess paradox in transportation networks and the Internet. She has also conducted

research on sustainability and quality issues with applications ranging from pharmaceutical and blood supply chains to perishable food products and fast fashion as well as humanitarian logistics. Anna has advanced methodological tools used in game theory, network theory, equilibrium analysis, and dynamical systems.

Naveen Sikka

Terviva

Naveen Sikka is the founder and CEO of Terviva, a company that produces sustainably grown oil and protein on marginal agricultural land.

Naveen holds degrees from UC Berkeley and Columbia University and has been featured in The New York Times, The Wall Street Journal, and The Economist. Naveen also serves on the Boards of Directors of Elemental Impact, an organization with over 150 portfolio companies that work on climate-related technologies, and Forest Trends, a nonprofit that works to conserve forests and other ecosystems.
